

# Intro to Computer Programming: week 1

This week's homework:

1. Get connected to your web site: `firstname.oshu.net`
  - a. Download and install an FTP client
    - i. Example: <http://filezilla-project.org/>
  - b. Log onto your site with
    - i. user name = [firstname@ohsu.net](mailto:firstname@ohsu.net)
    - ii. password = one you gave me in class
2. Read w3schools tutorial on HTML:
  - a. [http://www.w3schools.com/html/html\\_intro.asp](http://www.w3schools.com/html/html_intro.asp)
  - b. Read from this page thru HTML Lists (see left navigation panel)
  - c. Extra reading: HTML Advanced and HTML Media
    - i. Skip HTML Frames and HTML Iframes
3. Create home page for your web site:
  - a. Filename = `index.html`
  - b. FTP file to your site
  - c. Load your web site in your browser to test
4. Respond to class group email I will send out
  - a. This is to ensure you and I have a correct email connection

My email for this class will be [prof@kmpc.net](mailto:prof@kmpc.net)

Feel free to contact me during week with problems, questions, and issues by email instead of saving them for class time.
